SUMMARY

Software engineering intern candidate with professional interest in web development and data analysis and a passion for tackling new challenges. Experienced in Java, JavaScript and Python, and uses version control through GitHub. Heavily involved with Game Design Club and currently working on a video game using a game engine called Godot.

EDUCATION

Bachelor of Science, Computer Science

University of Wisconsin-Milwaukee, Milwaukee, WI

May 2028

GPA: 3.8

- **Anu and Satya Nadella Scholarship** recipient (full-ride scholarship)
- **Relevant Courses:** Intro to Software Engineering, Data Structures and Algorithms, System Programming, Discrete Information Structures, Linear Algebra and Differential Equations

SKILLS

- **Programming:** Experienced in Java, Python, C, JavaScript, HTML, CSS, Lua, and GDScript
- **Core Skills:** Version control, troubleshooting, debugging, documentation, and designing
- **Data Visualization and Analysis:** Experienced in Excel and Google Sheets and has an interest in data analytics.
- **Math:** Pursuing math minor; completed Calculus 1 and 2 as well as Linear Algebra and Differential Equations. Strong passion for learning, visualizing, and applying new math concepts.
- **AI:** Regularly employs Claude to assist with problems and speed up workflow.

PROJECT EXPERIENCE

Web Development, Intro to Software Engineering Course Project

April 2026 - May 2026

- Used HTML, CSS, and Python with the Django framework to design and program a simple scheduling app with team of students.
- Utilized Scrum to organize meetings and ideas and keep an agile workflow.

Java Programming, Data Structures and Algorithms Course Projects

Sept 2025 – Present

- Utilized Java in the design and creation of data structures including dynamic arrays, binary search trees, hash maps, and sorting algorithms.
- Employed GitHub for version control and collaborated with several other students to tackle challenges more effectively and develop skills.

Video Game Design, Personal Project

June 2024 – Present

- Conceived architecture of space-themed game, structured game play order, and employed object-oriented principles during GDScript coding process and development using the Godot game engine.
- Utilized version control in GitHub for project management and progress tracking.

ADDITIONAL EXPERIENCE

Bike Mechanic

May 2026 – Aug 2026

Truly Spoken Cycles, Milwaukee, Wisconsin

- Worked with a team of mechanics to locate and repair problems with customers' bikes.
- Used a retail system to organize and schedule work orders and invoice customers.
- Worked on a wide range of bikes including E-bikes.

Bike Mechanic

May 2024 – Aug 2024

Dream Bikes, Milwaukee, Wisconsin

- Worked with others to refurbish old and broken bicycles to be sold to customers.
- Helped customers locate and fix problems with their bikes.
- Managed a retail system to keep track of work orders and invoice customers.
